

Installation Guide
ISS Designs
Standards & Brackets

Mount ISS Designs wall standards 16” to 24” apart using #6 screws (provided). Use with wall anchors (Toggler AF6) when necessary.

Screw the top screw where desired. Then, mark the location of the rest of the screws using a level to ensure the standard is straight.

Slide bracket into the channel of the standard from top or bottom at a 45° angle.

Position at desired location.

Drop to a 90° angle to lock in place.
